

# Leveraging Sensor-Based Technology to Support Safe Fasting in Diabetes Care

**Wednesday, January 28<sup>th</sup>**

## SPEAKER:

**Dr. Prakash Chandra**  
MBBS, MS  
Endocrinologist

## LEARNING OBJECTIVES:

- Review and discuss the epidemiology and clinical implications for people living with diabetes who enter periodic phases of fasting.
- Implement strategies to reduce the risk of hypoglycemia in fasting patients living with diabetes treated with insulin.
- Leverage the use of glucose sensing technologies to improve self-management strategies for people living with diabetes who periodically enter periods of fasting for cultural or lifestyle goals.

Recording will be available on-demand for registrants
