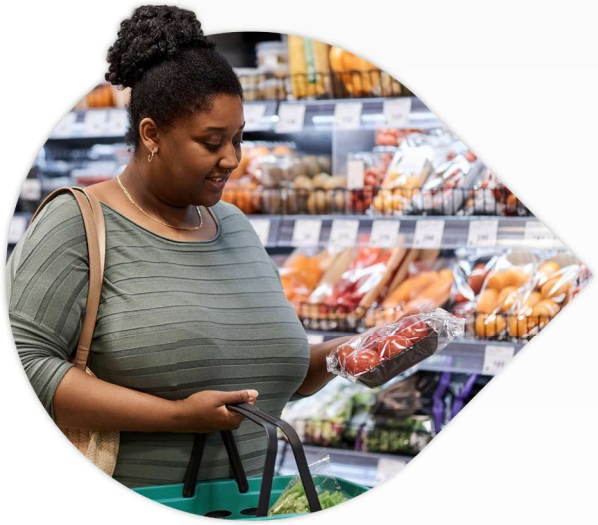
You are cordially invited to the following session:

Optimizing the Management of Type 2 Diabetes Using CGM



This program discusses how to support people in the use of Dexcom data to guide daily behavior choices and how clinicians can efficiently assess rtCGM data through the T2D lens to optimize treatment strategies and action plans.

At the end of this session, participants will be able to:

- Review the latest evidence for rtCGM use in people living with T2D across various treatment modalities.
- Share practical strategies to tailor the use of rtCGM tools to foster self-discovery and drive action in diabetes care.
- Explore case scenarios to refine your skills for effective rtCGM use in practice from onboarding to long-term follow-up care.

Dr. Faisal Hasan

MD, MRCP, Endocrinologist
