LIVE WEBINAR

Practical Applications of Glucose Sensing Technology to Reduce the Burden of Diabetes Self-Management

Wednesday, November

25 11:15am - 12:00pm *ABT*

1:15pm - 2:00pm *ABT*

Featured Speaker

Michael Vallis, *PhD*

Associate Professor, Family Medicine Dalhousie University, Health Psychology Consultant.

By the end of this session, you will be able to:

- Appreciate the burden associated with diabetes self-management and how behavioural demands can exceed a person's coping capacity.
- Understand how technology can help reduce diabetes burden and provide sustained behavioural support.
- Become familiar with time-efficient motivational communication strategies to reduce distress and promote adherence.
