

VIRTUAL EVENT

What is the Role of Sensor-Based Technology in People with T2D on GLP-1 Receptor Agonists?

Session Objectives:

1. Discuss how to easily and efficiently empower patients on the use of sensor-based technology.
2. Review data supporting benefits of sensor-based technology in T2D patients not on insulin.
3. Identify opportunities to integrate sensor-based technologies into management plans for people living with diabetes, focusing on T2D patients on GLP-1 RAs.

Dr Sue Pedersen,
MD, FRCPC, DABOM

Endocrinology & Metabolism Specialist

Thursday, August 20 2026
12:15 pm - 1 pm MT
