MANAGING MEALTIME INSULIN

# Using Set Units

TANDEM Diabetes Care

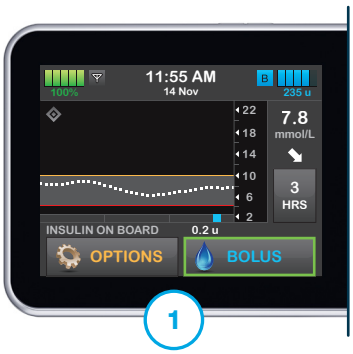

## Understanding Set Units

Set Units mean taking the same amount of insulin before each meal, for example, taking 10 units before lunch. You don't adjust set units based on your food or glucose level. Your healthcare professional will help decide if this method works for you and how much insulin to take.

## Entering Set Units for the t:slim X2 Insulin Pump

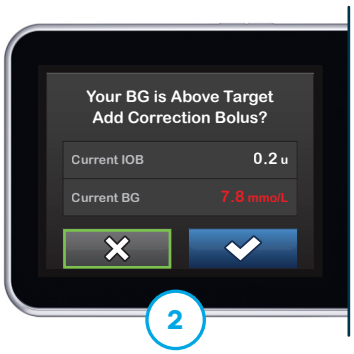

| My Set Units | | | |
|---|---|---|---|
| **Breakfast** | **Lunch** | **Dinner** | **Other** |
| _____ units | _____ units | _____ units | _____ units |

Images are for reference only. Your screen may look different and doses are not meant as suggestions.

1

Tap **Bolus.**

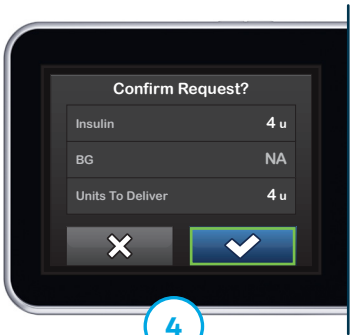

2

Tap ✕ to decline adding a Correction Bolus.

3

Tap **units** to enter your set units then tap ✓.

4

Confirm insulin amount and tap ✓.

5

Review and follow prompts to deliver bolus.

Tap **Confirm.**

5

Tap the **blue drop** to deliver the bolus.

**It's best to bolus before meals. But if you forget, Control-IQ technology can help with automatic insulin adjustments and AutoBoluses.**

**Important Safety Information:** Tandem insulin pumps are intended for the subcutaneous delivery of insulin, at set and variable rates, for the management of diabetes mellitus in persons requiring insulin. Visit tandemdiabetes.com/safetyinfo for additional important safety information.

**WARNING:** Control-IQ technology should not be used by anyone under the age of 6 years old. It should also not be used in users who require less than 10 units of insulin per day or who weigh less than 25 kilograms.
